Summary

Full Stack Developer with expertise in **.NET Core, Angular, and API development**. Skilled in Software Development, Frontend (Angular), and Backend (ASP.NET Core) development. Proficient in C#, C++, SQL, and Python, focusing on database optimization and delivering secure, efficient solutions.

Technologies

Languages: C#, C++, SQL, Python

Frameworks: .NET Framework, .NET Core, ADO.NET, Entity Framework, Angular

Databases: MSSQL

Operating System: Windows, Linux

Other: Strong problem Solving Skills, GitHub, API Development, Postman, Load Testing (JMeter)

Education

University of Mumbai, B.E. in Computer Engineering Aug 2019 – May 2023

Senior Secondary (12th Grade), Science, S.I.W.S College, Wadala June 2017 – May 2018

Experience

Full Stack Developer (Software Developer), Sahibandhu, Noida Aug 2024 – Nov 2024

BT Gold Loan:

- Optimized database procedures, reducing execution time by 40-50%.
- Resolved 10+ bugs across different environments at both the database and code levels.
- Contributed to a project that implemented load balancing to enhance system scalability and performance.

CRM Project:

- Developed APIs to interact with critical bank systems, ensuring seamless and secure data exchange between the CRM and bank APIs.
- Proposed and implemented a hybrid encryption model to address challenges with large data sizes in asymmetric encryption, improving data handling efficiency by 70% and security.
- Tech Stack: .NET Core (Backend), AES and RSA for hybrid encryption.

Projects

Fundo Notes  April 2024 – June 2024

- Developed a Notes Application with CRUD operations, integrating Angular for the front-end and .NET for back-end services.
- Implemented user **authentication and authorization** using JWT tokens, password hashing, and secure user verification features.

E-Commerce Application  June 2024 – Aug 2024

- Developed a bookstore app with features like search, filter, cart, and order processing using **Angular for the responsive UI** and .NET for back-end.
- Implemented user management with JWT-based authentication, role-based permissions, and applied security measures for data protection.
